

Software Requirements Specification- Finalized

Objective: Finalized Software Requirements Specification

You have been working on eliciting and validating the requirements. With this assignment you will finalize the first version of your software requirements specification (SRS). Recall that all requirements must be enumerated. Make sure you check for conflict and completeness.

- Specify the functional requirements.
- Specify the non-functional requirements.
- Specify the glossary of important terms, with proper definitions.
- The SRS must be documented on wiki using the markdown language.
